Made in Japan

ESTHER is a high-quality glitter yarn with a very soft texture.
Usage : By knitting ESTHER together with other yarns, you can achieve a
classy shine without compromising the texture of the other yarns.

エステルはとても柔らかい手触りを持つ最高品質のラメ糸です。
使い方：エステルを他の糸と組み合わせて編み立てすることで、相手方の
風合いを損なう事無く、ランク感のある輝きを加える事ができます。

ESTHER 是一款质地非常柔软的高品质金银丝纱线。
用法：将 ESTHER 与其他纱线编织在一起，在不影响其他纱线质地的情况下
可以增添优雅的光泽。

ESTHER Yarns: Setting a New Standard in Glitter Yarns.

Extremely Thin Nylon Slit Film.

We use a softer nylon glitter film than the typical polyester glitter film. The glitter film, which is cut to an extremely thin width of 0.15 millimeters, has a very soft texture.

Oeko-Tex® Class I Certification.

To maintain worldwide quality, ESTHER is certified with the strictest class of the Oeko-Tex® standard, Class I(App.6), which is the standard for babies.

Strong 2-ply film reduces film cutting issues.

A typical problem with glitter yarn is the cutting of glitter film during the knitting process, but ESTHER's film has sufficient strength due to its 2-ply structure.

ESTHER 是设定新标准金银丝纱线。

使用了极薄的尼龙薄膜

使用比一般聚酯膜更柔软的尼龙膜，0.15mm 宽的超薄薄膜实现了非常柔软的触感。

Oeko-Tex I 类认证。

为了保持世界一流的品质，ESTHER 通过了面向婴儿用品最严格的 Oeko-Tex I 类 (App 6) 的等级认证。

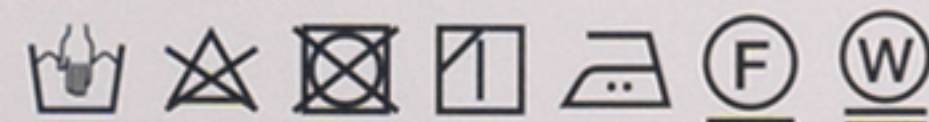

具有优异强度的双层薄膜结构减少了断丝问题。

金银丝的一个典型问题是编织过程中容易断丝，但 ESTHER 的薄膜由于其双层结构而具有足够的强度，使其不容易断丝。

Precautions for Metallic Yarn:

- *Keep dye lots separate.
- *Please avoid rewinding the yarn.
- *Acids and alkalis can damage Metallic Yarn. When string clothing that uses Lamé, please avoid contact with fabrics containing acidic chemicals.
- *Remove sweat, spills, etc. immediately by laundering in water or by dry cleaning.
- *Wash dark-colored products separately from other laundry.
- *Before string, first ensure that the Lamé is dry. Then cover with a thick polyethylene bag.
- *Please avoid using mothballs in the storage area.
- *Please contact us if you have any problems or troubles knitting with our Metallic Yarn.

WASHING INSTRUCTION

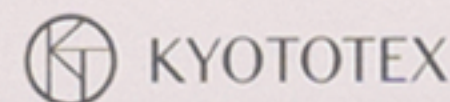

*Please put the cloth under the iron.
